Owing to circumstances beyond my control, many of my patrons have been disappointed in getting their quota of the Swedish laborers whour I have brought to Memphis. I received on Friday two lots, one of 112 (by rail) adults, and one of 64 (by river), making 176 adults, and 38 children—some families of five orsix children—and they were objectionable in many places. This caused delay in placing them, as well as entailing great expense on me. Had my agents advised the correctly of their movements I should have on me. Had my agents advised the correctly of their movements I should have filled every order completely. In consequence of the confusion of bringing together these two large parties, and the necessity of some rearrangement, some became dissatisfied and left; others have became dissatisfied and left; others have a left of the confusion of the See and deed away by parties who should have had honor enough to pay their framsportation, but did not.

WAR IN AFRICA.

The "Brudderin and Sistern" of Toncray Church on the Rampage.

time ago there was a little paragraph in the Arreat about the "Rev'd" John Brown and Toncray Church. This para-graph called forth a card from three or four darkies, who denounced the said 'reverend' and declared him out of the church. This gard was in turn replied to hurch. This card was in turn replied to A TORNEY-GENERAL OF THE CRIMnonnes M. D. WELCH as a candidate for Attorney-General of the Criminal Court. dess
to that effect. Here the matter
to the supposed that the troubles in the fold
he deem amicably adjusted. Such appears not to have been the case, however,
and on visiting the Adams street station.

On the by Brown, who declared that he was the lawful pastor of the Toncray congrega-tion, having received a decree in chancery and on visiting the Adams street statlou-house last evening, we learned the sequel to and culmination of the affair. On the docket we found the names Mahaly Brown and Butten Brown, charged with carrying concealed weapons, and disor-derly conduct. The prisoners had just been brought in and were sitting on the bench. On questioning them as to the nature of the offence, we learned that the throubles at Toneray, instead of having throubles at Toneray, instead of having subsided had increased, and at last culmi-

nated last evening in open war.

Mahaly's statement is that, under the decree of the court spoken of, the two contending factions of the church had arranged for one to occupy the church and ar-ranged for one to occupy the church for purposes of worship (or wash-up, as she expressed it), in the morning, and the other in the afternoon. For the past three or four Sundays the faction opposed to the Browns, and who had the building

and praying away at a great rate, and ap-parently with not the slightest idea of giving up the ship. The appearance of Parson Brown was the signal for a storm of hisses, groans, etc., and in a moment all was in an uproar. Like a prudent man, seeing a squally time ahead, and noticing that but few of his adherents were around, he made a rapid movement to the rear and be made a rapid movement to the rear and
got out of danger as quickly as possible.

Not so Mahaly, his loving spouse, and
Button. They, along with Hester Cockrell and another true and trusty henchman, defied the combined "powers of
derkness" and made fight. They were
soon overpowered, however, and bustled
out, receiving numerous applications of
number eleventeen boots in heir rear as
they "got." In the process of hustling of Mobile 11.00 p.m. 1 nigger weapon now a-days.

Forfeits were put up for them, and they were allowed to depart. The case will be

investigated this morning, and we look for some rich scenes in the Recorder's PRICE our Housekeeping Goods, less than any one in the city.

MEDICAL SCIENCE.

The Cost of Living in Memphis---Price of Vast Strides in its Progress-Wanderful Cures Effected by it.

Everybody.

It must always be interesting to the hu ar man race to hear of any improvement in the means of allevisting the natural and artificial sufferings of mankind, and any discovery in the mysterious fields of ma-teria medica must ever be hailed with de-30 875c light. The progress that has been made in this field, even within a few years, is 18 673c truly wonderful. Bold, investigating minds, allied with powerful physical en-durance and tenacity, have been at work and removed some of the rubbish of anand removed some of the rubbish of an cient superstition, which has so long attached to the science of healing. Methods of treatment have been simplified, and cures are effected now by gentle and soothing mesus, no more dreamed of fifty years ago than stoam engines, or telegraph lines, or ocean cables. Even chloroform, a simple agent, which has alleviated so much soute suffering, particularly in the late war, was unknown to the medical fraternity until about twenty years ago. Nitrous oxide of gas, which lulls the system into a sleep as sound as death for a time, was discovered and applied only a few years ago. Who will say that other developments equally as won—Humboldt has a mystery—and one

piled only a few years ago. Who will say that other developments equally as wonderful cannot be made in this material and progressive age? We are a matter of fact people, and every year we inquire more for practical results than old and valueless theories. Times have wonderfully changed since the doctor combined the profession of bleeding with that of the barber, and had for his sign a striped pole. These thoughts, which might be enlarged upon by the column, are partly suggested by some facts of late dare, which cannot be accounted for upon the theories generally advocated by the medical fraternity. They are a learned, intelligent, thinking body, but slow to yield up their hereditary practices and opinions. Those who dare to take a step in advance of any system not laid down

in advance of any system not laid down in old books is often treated with distrust. But this matters not to the people, few of whom can read a Latin prescription, few of whom can read a Latin prescription, provided the progressive physician can show practical results and deal strate that this new mode of treatment is an improvement on the old and mysterious one which they never fully understood. There is now in Memphis an allopathic physician of transfer transfer practice in physician of twenty years' practice in New York, who has effected cures of old New York, who has effected cures of old chronic cases, given up as hopeless by doctors of the highest repute. To show that these cures are genuine and permanent, we will refer to some of the patients not alive and well in this city, who had been given up by other doctors. One is Mrs. Doctor Burns, who resides at 51 Market street. Her eyesight failed her some three years are and she was affected with

A steamboatman named Edgar, mate of the Celeste, was arrested by the police Saturday night, at a late hour, on a telegram from Little Rock. It seems, from what we could learn of the affair, that while the Celeste was lying at Little Rock, Edgar was assaulted by a negro deek. Edgar was assaulted by a negro deek hand, and in the struggle which ensued, stabbed his assailant so seriously that he since died. Information of the death of the negro, was forwarded hither by telegraph, and Edgar was warned during the evening that he would be arrested, but took no steps toward securing his safety by flight or concesiment. He will be carried to Little Rock to-day, unless legal steps are taken to prevent it.

The steamer R. N. Rice arrived from Detroit at Cleveland, Ohio, Friday morning, being the pioneer boat of the season.

There is considerable ice off that port, but The Ida Campbell, a small steamer was sunk a few days ago at Durand, on the Upper Massissippi, by the ice.

A St. Louis exchange has the following in reference to the Richmond: We have the authority of Mr. Philo Young and Captain Jonn P. Fitzgerald for stating that the pilots of the Champion were aware that the Richmond had met with a serious disaster. When the Champion met the Thompson Dean, the pilots of the former hailed those of the latter with the information that "the Richmond is sunk." It was about three a.m. when the Champion passed the Richmond, which the latter's passengers were on shore where lights were hurning, and her freight thickly strewed the current. Three times did the Richmond hall the plassing steamer with her bells. No response came, and the Champion passed on. Some steamer passed, at all events, paying no attention to the distressed Richmond, and it is believed that the Champion was The Ida Campbell, a small steamen, was Serplan Din Wek;
